UM CHEMISTRY PROFESSOR
RECEIVES \$4500 GRANT

MISSOULA--

Dr. John Stewart, professor of chemistry at the University of Montana, has received \$4,500 from the Diamond Alkali Co. of Cleveland, Ohio, for continued research work in "the synthesis of novel types of organic compounds."

Dr. Stewart said the grant will be used to fund a graduate assistantship in the UM chemistry department and for analytical services performed outside the University.

This is the second year the company has supported this research.
